Work Experience

RESEARCH ASSISTANT, WILFRID LAURIER UNIVERSITY, WATERLOO, ONTARIO – 2015 - PRESENT

- Lead designer and developer of a Wordpress enabled websites used to display information regarding a research project as well as a conference presented by the Geography department at Wilfrid Laurier University. (www.laurierenvironmentalmigration.com)
- Worked closely with lead professor in charge of the research project and conference to ensure his needs were met in terms of the website's functionality, content and design.

CHAIR OF OPERATIONS, PHI (SOCIETY OF COMPUTING, PHYSICS AND MATHEMATICS) – 2015 - PRESENT

- Performing several duties including event planning, meeting minutes and booking rooms.
- Effectively contributing to club brand and environment by attending club events and being a positive club ambassador.

MANAGER/MARKETING/KITCHEN, FRITES, WATERLOO, ONTARIO – MAY 2014-OCTOBER 2015

- Graphic designer of several promotional materials contributing to franchise growth including mass distributed flyers, menu boards and store front signage.
- Organized, produced and maintained documents that improved restaurant operations.
- Gave customers great service resulting in repeat customers and enhanced brand image.

Education

Wilfrid Laurier University, Waterloo, Ontario – Honours Computer Science (BSc) - (Expected Completion 2017)

Qualifications

- Practical use and understanding of Java, Python, HTML5, JavaScript, CSS3, C, Git, Bootstrap JQuery, AngularJS, x86 assembly, VHDL, Visual Basic.
- Intermediate knowledge of cross platform mobile app development utilizing Apache Cordova and Ionic Framework.

Projects

- Launched the start up "Lumaki" (www.lumaki.co) in November of 2015, offering services in web design, mobile app development and graphic design. With these services I'm also creating products under this company with the first being a money saving mobile application. I've approached several small businesses to participate in this app with success and hope to launch in March of 2016.
- Participated in the Canadian Open Data 2014 Programming challenge. I worked along side two other team members to develop an app in 48 hours utilizing open data. ("See Toronto" – BlackBerry World).
- Older Projects: Developer of "The Daily Budgeter"(BB), "Grim Jim" (iOS, Android).
- Volunteering: WWF CN Tower climb, Habitat for Humanity Guelph and Guelph Soccer Club.
